ABOUT PETROLODEX

Petrolodex is a Dubai-based physical commodities trading house specializing in the sourcing, verification, and delivery of refined fuels, gases, and industrial bulk commodities across global markets. ***We operate as a contractual principal***, securing direct allocations, taking title to product, and controlling both physical and financial risk from load port to discharge

We maintain direct relationships with National Oil Companies, state-owned refineries, licensed offtake mandates, and institutional trading partners across the Middle East, Africa, Europe, Asia, and the Americas. Our clients operate in energy, aviation, maritime, industrial manufacturing, agriculture, and government procurement.

Our focused portfolio concentrates on high-execution products in which we hold dedicated allocations: EN590 (ULSD 10/50 ppm), HFO (180/380 CST), VLSFO, LPG, Urea N46%, and Sulphur, available under both FOB and CIF terms.

Every transaction is backed by structured counterparty verification, standardized product authentication, and clearly defined procedural frameworks that guarantee full transparency and accountability from initial inquiry through to discharge. For businesses that value precision, reliability, and long-term partnership, Petrolodex delivers exactly that.

Confidential & Proprietary

EXECUTIVE MANAGEMENT STATEMENT

The global energy industry is one of the most dynamic and consequential markets in the world. At Petrolodex, we built our company around a single conviction: that access to reliable, verified, and professionally executed petroleum supply should never be a barrier to growth for any business, in any market, anywhere in the world.

From our headquarters in Dubai, one of the most strategically significant energy and trade hubs on the planet, we operate with a global perspective and a deeply local understanding of the markets we serve. Our reach extends across the Middle East, Africa, Europe, Asia, and the Americas, supported by longstanding relationships with refineries, licensed mandates, institutional buyers, and trading partners that represent some of the most respected names in global commodity markets.

We serve a diverse range of sectors from energy, aviation, maritime, industrial manufacturing, agriculture, and government procurement. Across all of them, our clients come to us for the same reasons: verified supply, structured processes, compliant documentation, and a principal partner with the experience and discipline to carry a transaction all the way through to delivery. That is precisely what we deliver on every engagement.

As a physical principal, we do not broker, we take positions, manage freight, and stand behind our contracts. We look forward to building on that foundation and continuing to serve the global energy industry with the excellence and dedication that defines everything we do.

Sincerely,

Allan Buenafe

STRATEGIC POSITIONING & TRADE ARCHITECTURE

Operating as Principal

Petrolodex is a physical trading house as contractual principal. We do not broker. We secure direct allocations, manage international freight, and control physical risk to deliver seamless, end-to-end supply chains, carrying title and accountability at every stage of the transaction.

Dual-Engine Distribution

- **Local UAE Market Hub:** Distributing directly from our Dubai and Hamriyah storage facilities to regional transport fleets, utilities, and commercial industries.
- **Global Maritime Desk:** Executing heavy-volume FOB and CIF trade flows across Singapore, Fujairah, and Rotterdam.

PRODUCT PORTFOLIO MATRIX

Petrolodex maintains dedicated physical allocations across a focused range of high-execution refined fuels, gases, and industrial commodities. Each line is directly sourced, independently verified, and deliverable under both FOB and CIF terms.

PRODUCT	GRADE/ SPECIFICATION	PRIMARY SOURCING	KEY APPLICATION	TERMS
EN590 (ULSD)	10 ppm & 50 ppm	Direct NOC, state-refinery & global wholesaler offtakes	Diesel for GCC transport, bunkering & heavy manufacturing	FOB / CIF
HFO	180 CST & 380 CST	Deep-water refinery blending hubs	Marine propulsion and thermal power generation	FOB / CIF
VLSFO	Max 0.50% Sulphur (IMO 2020)	Deep-water refinery blending hubs	IMO-compliant bunkering for deep-sea Autogas	FOB / CIF
LPG	Propane & Butane (pressurized/refrigerated)	Primary gas-fractionation terminals	Commercial utilities, industrial processing & Autogas	FOB / CIF
Urea N46%	Prilled & granular, 46% nitrogen	Gas-based producers, primary allocation	Agricultural fertilizer & Industrial feedstock	FOB / CIF
Sulphur	Granular & lump, high-purify elemental	Secure primary asset allocations	Sulphur, metallurgy & fertilizer production	FOB / CIF

All grades subject to specification confirmation, allocation availability, and comply full AML/KYC onboarding. Refined fuels, gases, and dry-bulk commodities are executed on a strictly principal basis. Full SGS/Intertek specification sheets and past performance sanitized documents available upon secure KYC onboarding.

✓ VERIFIED MARKETPLACE

Every counterparty vetted, every Barrel authenticated.

✓ COMPLIANCE-FIRST

AML/KYC, ISO framework, and non-sanctioned sourcing.

✓ GLOBAL REACH

Active across Fujairah, Singapore, Rotterdam, and beyond.

TRADE FINANCE, BANKING & COMPLIANCE

I. Transaction Clearing & Trade Finance

- **Regional Clearing:** Top-rated UAE and GCC financial institutions.
- **Global Trade Finance:** Tier-1 Prime Global Banks covering major international trade corridors.
- **Approved Trade Instruments:** Fully operative SBLC, DLC, and MT103, issued strictly via Top-25 Prime Banks.

II. Risk Hedging & Counterparty Security

- **Price Risk Mitigation:** Active derivatives and futures hedging via ICE and NYMEX (CME) to lock crack spreads in transit.
- **Credit & Offtake Protection:** Direct, multi-year offtake contracts secured with National Oil Companies, state-owned refineries, and verified global wholesalers.

III. AML, KYC & Non-Sanctioned Sourcing

- **Strict AML & KYC Vetting:** Mandatory compliance onboarding through enterprise risk-screening systems.
- **100% Non-Sanctioned Sourcing:** Complete product traceability with certified Proof of Origin (COO) and zero-sanction compliance.
- **Institutional Frameworks:** ISO 9001 | ISO 14001 | ISO 45001 | Dun & Bradstreet Registered | ICC Incoterms Compliance.

LOGISTICS CONTROL

Petrolodex maintains direct operational control over the movement and storage of every cargo we trade. Our logistics desk manages the physical chain end-to-end, so delivery performance is never left to chance and product integrity is preserved from load port to discharge.

I. Maritime Chartering

We charter tonnage directly through P&I-insured shipping lines, securing suitable vessels for clean and dirty product, negotiating laytime and demurrage terms, and coordinating voyage scheduling to meet every contractual delivery window.

II. Terminal & Storage Management

We manage dedicated tank capacity and throughput across our Dubai and Hamriyah hubs and partner terminals along key corridors, controlling receipt, storage, blending, and outturn to protect product quality and specification at all times.

III. Port Agency Coordination

We appoint and direct port agents at both load and discharge, coordinating berthing, customs clearance, documentation, and cargo operations to keep vessels moving and turnaround times tight across every gateway we operate.

Confidential & Proprietary

RISK MANAGEMENT & CARGO ASSURANCE

Every CIF cargo we execute is protected by a disciplined, layered risk framework built to institutional standards. We ensure value, verify quality, and remove single points of failure from the transaction, delivering a bankable, fully de-risked supply chain.

I. Marine Cargo Insurance

CIF shipments are secured under Institute Cargo Clauses (A) the wildest all-risks marine cover available, insured to 110% of cargo value to protect the buyer’s full commercial interest throughout the voyage.

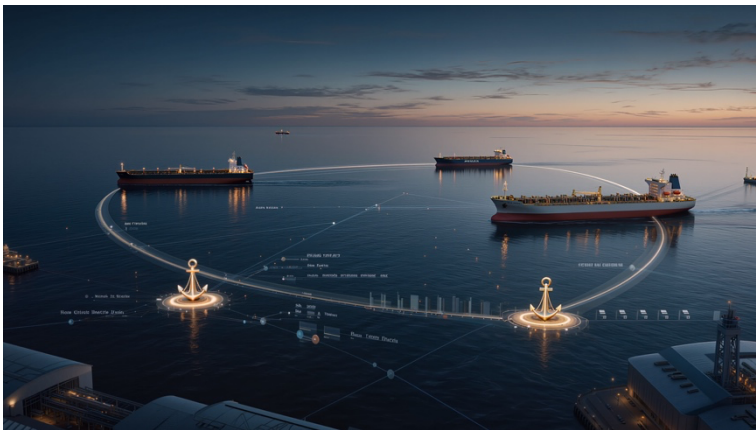

II. Independent Third-Party Inspection

Cargo is inspected by neutral, internationally accredited surveyors, SGS and Intertek, at load and discharge, issuing binding certificates of quality, quantity, and origin that protect both counterparties.

III. End-to-End Assurance

Combined with P&I-insured tonnage, certified Proof of Origin, and structured trade-finance instruments, our cargo risk framework delivers a fully protected transaction from load port to final discharge.

RISK MANAGEMENT & CARGO ASSURANCE.

Sovereign Supply Gateways

Hamriyah Port (UAE)		Local storage assets, regional distributions, and dry-bulk Urea/Sulphur logistics
Port of Fujairah (UAE)		East/West African maritime bunkering and bulk cargo dispatch.
Port of Singapore		East-bound trading lanes, APAC regional clearing, and subcontinent deliveries.
Port of Rotterdam		Western Europe terminal storage and ARA distribution logistics.
